Automatic Creation of Sales Orders from Excel (4G5)

Type: Process
SubType: Task Automation

Publisher: SAP S/4HANA
Catalog: Business Content

Version: 1.2.1
Last Modified : Jul 7, 1:47 pm

[Ready to use](#) [Template](#)

[Description](#) [Tags](#) [Documents \(8\)](#) [Artifacts \(14\)](#) [Version History](#) [Dependencies \(3\)](#)

Problem

Companies frequently receive order requests from customers as email attachments in the form of Excel spreadsheets. The Internal Sales

This is a very time-consuming and error-prone process, which adds unnecessary manual effort and poses potential risks and delay to the

Solution

The bot automates the sales order creation process, allowing companies to create a larger volume of sales order in less time with reduced

The bot monitors a specified base folder with Excel files and/or scans unread emails with Sales Order in the subject line and having the E relevant stakeholders with details of sales orders created in the system.
